ABHISHEK THAKUR

Python Developer | Django | FastAPI | PostgreSQL | GitHub | Docker | AWS S3

Noida, Uttar Pradesh, India | +91 7985142638 | at782951@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Python Developer with 2 years of experience in backend development, specializing in Python, Django, Django REST Framework, REST APIs, PostgreSQL, and data-driven applications. Currently working on Sustain3P, an ESG and sustainability management platform, developing tenant-based features, ESG calculation workflows, report automation, AWS S3 integrations, and backend APIs.

Hands-on experience in database design and query optimization, third-party API integrations (Twilio, Razorpay), and containerization with Docker and CI/CD workflows. Known for writing clean, maintainable code and turning business requirements into reliable, scalable software.

PROFESSIONAL EXPERIENCE

Python Developer | Cognitensor.AI — Oct 2025 – Present

Sustain3P – ESG & Sustainability Management Platform | Django, DRF, PostgreSQL, AWS S3

- Developing tenant-based backend features for Sustain3P using Python and Django, keeping each organization's ESG data securely isolated.
- Building ESG calculation workflows that process Environmental, Social and Governance metrics into accurate, auditable results.
- Automating sustainability report generation and integrating AWS S3 for secure storage and retrieval of documents and reports.
- Designing RESTful APIs with Django REST Framework and optimizing PostgreSQL schemas, queries and indexes for large ESG datasets.
- Collaborating with frontend and product teams; using Git/GitHub, Docker and CI/CD pipelines for code reviews and smooth deployments.

Full Stack Developer | Appz Global Tech Pvt. Ltd. — Dec 2024 – Oct 2025

Service-based company | FastAPI, Python, MySQL

- Built and delivered backend services and REST APIs using FastAPI for multiple client projects.
- Developed API endpoints for face-recognition-based attendance and Automatic Number Plate Recognition (ANPR) for smart parking.
- Integrated third-party services including Twilio (WhatsApp messaging) and Razorpay (payments), with automated PDF generation and session management.
- Designed and optimized relational database schemas for seamless data flow across applications.

PROJECTS

AI Construction ERP & CRM – Multi-Tenant SaaS

- Building a multi-tenant SaaS ERP/CRM for construction and electrical contractors on a shared PostgreSQL database, with tenant isolation enforced at the Django/DRF layer.
- Designed a module and role-based access control (RBAC) system: Super Admin enables modules per tenant, and every request is checked for tenant, module status and role permission (view/create/edit/delete/approve).
- Modelled core business entities including customers, projects, sites, BOQ and quotations, labour attendance, materials, expenses, payments and daily site progress.
- Developing a React dashboard on top of REST APIs, containerized with Docker for consistent development and deployment.

WhatsApp Ticket Booking Chatbot (AI)

- Built an AI-powered WhatsApp chatbot for bus, flight and hotel bookings using FastAPI, Twilio and Rasa NLU.
- Integrated Razorpay payments, a form-link booking flow and automated PDF ticket generation sent directly on WhatsApp.
- Built FastAPI webhook endpoints with session management to handle multi-step conversations and store bookings, users and payment status in MySQL.

TECHNICAL SKILLS

Languages: Python, SQL
Backend & Frameworks: Django, Django REST Framework, Django ORM, FastAPI, RESTful APIs
Concepts: Multi-Tenant Architecture, Role-Based Access Control (RBAC), JWT Authentication, Database Design, Query Optimization
Integrations: Twilio, Razorpay, Rasa NLU
Databases: PostgreSQL, MySQL
Cloud & DevOps: AWS S3, Docker, CI/CD
Frontend: React.js, HTML5, CSS3
Tools & Version Control: Git, GitHub, VS Code

EDUCATION

Master of Computer Applications (MCA) | Kanpur Institute of Technology — Oct 2022 – Jul 2024
